

ConfigBuilder - User Interface

This is the 'home' page of *ConfigBuilder* - the six icons are active buttons, which (when clicked) open a new page in the web-application.

The screenshot shows a web browser window with the address bar displaying `localhost:2351/default.aspx`. The browser's address bar and tabs show the application is running locally. The page features a navigation bar with links: [How To](#), [Training](#), [About](#), [Contact](#), and [Logout](#). The main content area is titled "ConfigBuilder" and includes an "Overview" section. This section describes the application as a suite of tools for ensuring consistency in NetApp installations and lists compatibility with IE 8 (minimum), Chrome, and Firefox. Below the overview, there are six numbered steps, each with an icon and a description:

- 1 Collect Data**: Where you can create a template Configuration Spreadsheet (on which you can) record the configuration settings of an installation.
- 2 Create Build Guide and Script**: Where you can create the Build Guide and Build Script you will need to configure the system you are building.
- 3 Plan and Configure**: You can create planning documentation and view best practices from here.
- 4 Record As-Built Configuration**: You can validate the As-Built configuration against the specification from here.
- 5 Complete a Job**: Provides guidelines on how to submit a Service Event Report (SER).
- 6 RackBuilder**: Provides ...

The footer of the page indicates "(c) NetApp Inc. 2016".
